Women in Science and Engineering (WiSE) is a program committed to preparing, motivating, and empowering women in all engineering disciplines and beyond. We are supported in these purposes by an environment which appreciates the individual experiences of its members and is dedicated to fostering their intellectual and personal growth. To maintain our community, we hold one another accountable for certain basic values.

These include:

**RESPECT** - We treat all people with care, respect, and dignity. We value and encourage diversity, which enriches our experiences in learning, working, and living together. We do not tolerate any form of discrimination, harassment, intimidation, or assault, and we reject behavior that is degrading to ourselves or those around us. We communicate appropriately and clearly, and believe that all discourse and treatment of others should be respectful of the individual.

**INTEGRITY** - We strive for the highest standards of excellence. We fulfill all our commitments to the best of our ability. We take responsibility for our actions and represent ourselves truthfully.

**INTELLECTUAL INQUIRY** - There is a commitment to learning on the part of all members of our community. We support one another in the pursuit of education and understanding with sincere encouragement, never losing sight of our common goal.

**COMMUNITY** - We honor our physical resources by preserving and maintaining property in appropriate ways. We value our interpersonal relationships and recognize the role each of us plays in creating a system of support.

---

**PEER MENTORING COMMITMENT** – We are committed to meeting once per month with our mentor/mentee at a time agreed upon by both of us. Additionally, we are committed to attending one social event, one educational event, and one WiSE event of our choice each semester. We know our social events should be attended with our mentor/mentee. We understand this means filling out all appropriate forms associated with our meeting. We realize this commitment requires commitment from both the mentor and the mentee in order to achieve a successful mentoring relationship.

---

*I acknowledge that my actions reflect upon the integrity and reputation of the Women in Science and Engineering (WiSE) program as well as on my individual character. I take personal responsibility to uphold the WiSE Code of Conduct and further acknowledge that if I am found to have violated the values set out in this document, I may be asked to leave the WiSE Program.*
